

INSTRUCTIONS FOR USE

POWER CLEANING I10

HIGHLY CONCENTRATED ACID DETERGENT

for limescale, mineral deposits
and organic dirt removal

10L

PURPOSE

Professional acid detergent for effective removal of limescale, mineral deposits, rust and organic dirt from various surfaces and equipment.

- SUITABLE FOR CLEANING:
- Stainless steel equipment and surfaces
- Machines and production equipment
- Floors and walls
- Tanks and containers
- Sanitary areas and toilets
- Acid-resistant surfaces

WIDE APPLICATION IN PROFESSIONAL FACILITIES

Ideal for cleaning stainless steel equipment, production lines, tanks and work surfaces. Effectively removes limescale, mineral deposits and organic dirt.

Apply the product and leave it for 5–15 minutes, then rinse thoroughly with clean water. For surfaces that come into contact with food, always perform a final rinse with drinking water.

Suitable for professional cleaning of floors, walls, sanitary areas, production facilities and all acid-resistant surfaces.

Designed for cleaning machines, stainless steel equipment, production lines and process equipment in the food industry.

Can be applied with foam systems, satellite systems, sprayers or manually. High concentration ensures economical use and excellent cleaning performance.

Excellent for removing limescale, calcium deposits, rust and stains from sanitary areas, sinks, faucets and ceramic surfaces.

DOSAGE

Working solution concentration: 2% – 10%

Level of dirt	Concentration
Light deposits	2%
Regular cleaning	2% – 3%
Medium deposits	3% – 5%
Heavy deposits	5% – 8%
Very heavy deposits	8% – 10%

From 20 ml to 100 ml of product per 1 L of water

Dosage: 2% – 10%

APPLICATION

1

Prepare a working solution with a concentration of 2% to 10%.

2

Apply the solution using a foam system, sprayer, sponge, brush or high pressure.

3

Leave to act for 5–15 minutes.

4

Rinse thoroughly with clean water.

5

For stubborn deposits, repeat the process or use a higher concentration.

For surfaces that come into contact with food, always perform a final rinse with drinking water.

ADVANTAGES

✓

Effectively removes limescale, rust and mineral deposits

✓

Excellent action on all acid-resistant surfaces

✓

Suitable for CIP systems and foam cleaning

✓

Economical – high concentration

✓

Safe for acid-resistant surfaces and equipment

✓

Food industry suitable

SAFETY

Use protective gloves and goggles.

Ensure adequate ventilation during use.

Wash hands after work.

Keep out of reach of children.
